Creative and detail-oriented Web Designer and UI/UX Developer with 5+ years of experience building responsive, pixel-perfect interfaces using HTML5, CSS3, SCSS, Bootstrap, Tailwind CSS, and React.js. Strong understanding of design principles, layout systems, and cross-browser compatibility. Skilled in transforming wireframes and mockups into clean, reusable components that ensure consistency, scalability, and user satisfaction. Known for delivering polished web experiences with a focus on usability, performance, and visual hierarchy.

SKILLS

- HTML5
- CSS3
- Bootstrap (v5.3)
- Tailwind CSS (v3.4)
- React.js (v18)
- JavaScript (ES6+)
- Graphics
- Figma
- Wordpress
- Adobe Photoshop
- Adobe Illustrator
- Git

EXPERIENCE

UI/UX + Web Designing

KindleBit Solutions Pvt. Ltd.   *Sep 2019 - Feb 2022*

At KindleBit Solutions, I worked as a Web and UI/UX Designer, where I was responsible for creating responsive website layouts using HTML, CSS, and Bootstrap. I designed a variety of visual assets including banners, logos, and mockups, and developed clean, user-friendly interface designs using Figma and Adobe Photoshop.

Web designer & Front-End(React-JS)

OffsureIT Solutions   *Mar 2022 - Present*

At OffsureIT Solutions, I'm working as a Web Designer focusing on frontend development using React.js, SCSS, Tailwind CSS, and Bootstrap. My responsibilities include creating responsive admin panels and user interfaces, ensuring cross-browser compatibility, and building scalable UI components. I collaborate with the team to convert UI mockups into functional layouts, maintaining visual consistency and performance across multiple live client projects.

PROJECTS

Xeemu Studio

Frontend developer   *Jan 2024 - May 2024*

Tech Used: Next.js, React.js, Bootstrap 5, JavaScript (ES6+), Responsive Web Design, API Integration

Link:- ⧉ xeemu.com

Developed and deployed the official **Xeemu Studios web platform**, showcasing their gaming and app development portfolio. Focused on creating a **responsive, user-friendly, and visually appealing interface** to highlight projects across mobile, AR/VR, and metaverse platforms.

- Built SEO-friendly **Next.js pages** with server-side rendering (SSR) and static site generation (SSG)
- Developed **reusable React components** and styled them using **Bootstrap 5** to ensure responsive, mobile-first UI.
- Implemented **optimized routing, image optimization, and code-splitting** with Next.js.

Delivered a fast, responsive, and visually engaging website that enhances Xeemu's digital presence and supports user engagement across platforms.

Change Therapy Platform
Web & Admin Panels Frontend Developer *Jul 2024 - Dec 2024*
Tech Used: React.js (v18), Bootstrap 5, REST APIs, Create React App

Link:- Main Web | Vendor Panel | Admin Dashboard

Built a complete therapy management platform with three separate panels for users, vendors, and admins.

- **User App:** Designed a responsive web app where users can sign up, log in, and book therapy sessions. Focused on clean layout, smooth navigation, and mobile-friendly design.
- **Vendor Panel:** Developed a dashboard for therapists to manage their availability, time slots, chat with users, and update profiles and status in real time.
- **Admin Panel:** Created a centralized admin interface to manage all users, vendors, and platform settings. Integrated secure routing and dynamic content handling via REST APIs.

Handled the entire frontend development independently, ensuring consistency across all panels and seamless user experience.

Purple Box
Frontend Developer *Nov 2024 - Present*
Tech Used: React.js (v18), Tailwind CSS (v3.4), SCSS

Links:- Church Panel | Super Admin | Sports Admin

Developed three separate admin panels from scratch for managing church and sports data across different user roles:

- **PurpleBox Churches:** A panel for individual churches to manage their own data, including members, events, and internal records.
- **PurpleBox Super Admin:** A centralized dashboard to oversee and manage data from all registered churches.
- **PurpleBox Sports Admin:** A dedicated admin panel for managing sports-related data such as coaches, colleges, players, and events.

Handled the entire frontend development independently—from layout design and component architecture to API integration and responsive styling. Focused on clean UI, role-based access, and scalable code structure to support real-time data management across all platforms.

OverNight Websites
UI developer *Apr 2025 - Jun 2025*
Tech Used: HTML5, SCSS (Dart Sass 1.89.1), Bootstrap 5.3

Link:- Over Night

Developed a collection of 17 responsive website templates from scratch. Focused on clean layout design, modular SCSS styling, and mobile-first responsiveness using Bootstrap. Integrated a contact form with API functionality to handle form submissions securely and efficiently. Each template was lightweight, accessible, and ready for quick deployment across different business types.

Tabbo Games Platform
From End Developer *Feb 2025 - Jul 2025*
Tech Used: React.js (v18), Tailwind CSS (v3.4), Vite (v5), Axios (v1.6), React Router v6

Link:- Taboo Web

Designed and developed a fully responsive gaming platform that allows users to **create, host, and purchase games** through a clean and intuitive interface. The project involved building reusable UI components in React and styling them using Tailwind CSS for a consistent and modern look across all devices. Integrated REST APIs using Axios to fetch and update data in real time, including game listings, user accounts, and purchase history.

Taboo Game
UI Redesign Frontend Developer
Tech Used: React.js (v18), Styled Components (v6), React Router v6
Link:- Taboo Game

Worked on a web-based version of the classic Taboo game, designed for friends and families to play together in person or over video calls like Zoom or Google Meet.

The client provided the existing codebase, and my role was to **revamp the entire UI** by replacing old CSS with **Styled Components**. Focused on improving layout structure, responsiveness, and code maintainability—while keeping the original game logic intact.

EDUCATION

Graduation
Kurukshetra University *Jan 2019 - Jan 2022*

Diploma in Computer Science
Govt. Polytechnic, Ambala *Jan 2015 - Jan 2018*

12th
Haryana Board of School Education (HBSE) *Jan 2018 - Jan 2019*

10th
Arya Sen Secondary School, Naraingarh *Jan 2014 - Jan 2015*

MBA
Lovely Professional University *Jan 2022 - Present*

CERTIFICATIONS

PHP Training
Infowiz, Chandigarh *2016-06-01*
Duration: 45 Days

C, C++
GIIT, Ambala City *2018-08-01*
Duration: 3 months

Web Designing
GIIT, Ambala City *2018-08-01*
Duration: 6 months

SOFT SKILLS & INTERESTS

- Good at solving problems and finishing work on time
- Comfortable working alone or in a team
- Always learning new tools and improving design skills
- Pay close attention to layout and clean design
- Interest in UI trends, minimal designs, and smooth user experience
- Personal interests: skincare, design inspiration, and journaling ideas
