in <https://www.linkedin.com/in/sheetal-saini-5b75a817b/> 🌐 <https://sheetal.web.app>

UI/UX Designer and Frontend Developer with 6+ years of experience designing and developing responsive, user-friendly, and visually engaging web interfaces. Skilled in creating wireframes, user flows, and high-fidelity designs using Figma, with a strong focus on usability, visual hierarchy, and modern design standards.

Experienced in frontend development using HTML5, CSS3, Tailwind CSS, and React.js, with hands-on experience building responsive web applications and reusable UI components. Also have experience working with WordPress (Elementor) for building responsive and easy-to-manage websites.

Strong understanding of user-centered design, cross-browser compatibility, and performance optimization. Passionate about creating clean, intuitive, and scalable digital experiences that combine design and development effectively.

SKILLS

EXPERIENCE

Multimedia Executive (UI/UX & Frontend Developer)

Virtual Employee Private Limited Oct 2025 - Present

At Virtual Employee Pvt. Ltd., I am working as a Multimedia Executive, contributing across UI/UX design, frontend development, web design, and WordPress development. My role involves designing user-centric UI/UX layouts and wireframes using Figma, while ensuring visual consistency and usability across projects. I develop responsive and scalable frontend interfaces using HTML5, CSS3, Tailwind CSS, and JavaScript, with a strong focus on performance and cross-browser compatibility.

I also work extensively on WordPress development, including theme customization and page building using Elementor, translating design concepts into fully functional and responsive websites. Additionally, I collaborate closely with internal teams & direct with clients to understand project requirements, implement modern design standards, and deliver high-quality web solutions that enhance user experience and meet business goals.

Frontend Developer & Web Designer

OffsureIT Solutions Mar 2022 - Sep 2025

At OffsureIT Solutions, I'm working as a Web Designer, focusing on frontend development using React.js, SCSS, Tailwind CSS, and Bootstrap. My responsibilities include designing and developing responsive web interfaces, ensuring cross-browser compatibility, and building scalable, reusable UI components. I also contribute to UI/UX design by creating visually engaging layouts, festive themes, and custom design elements to enhance user experience and brand appeal. Additionally, I collaborate closely with the development team to translate UI mockups into fully functional, high-performance layouts for multiple live client projects.

Web Designer & UI/UX

Kindlebit Global Pvt. Ltd. Sep 2019 - Feb 2022

At KindleBit, I worked as a Web and UI/UX Designer, where I was responsible for creating responsive website layouts using HTML, CSS, and Bootstrap. I designed a variety of visual assets including banners, logos, and mockups, and developed clean, user-friendly interface designs using Figma and Adobe Photoshop.

PROJECTS

Culinary Curator – Food App UI

UI/UX designer 2026

Tech Used: Figma

Link:- [App Link](#)

Designed a complete mobile food ordering app UI focusing on clean design, intuitive navigation, and engaging user experience.

- Created end-to-end user flow including onboarding, home screen, product listing, cart, and checkout
- Designed wireframes and high-fidelity UI screens using Figma
- Focused on mobile-first design, visual hierarchy, and usability

Delivered a modern and user-friendly app design optimized for smooth user interaction.

Peptechco Website

WordPress Developer & UI Designer 2026

Tech Used: WordPress, Elementor, ACF, WooCommerce, Custom Post Types

Link:- [Web Link](#)

Designed and developed a dynamic business website with eCommerce functionality and custom content management.

- Built complete UI using Elementor with responsive layouts
- Implemented ACF and custom post types for dynamic content
- Integrated WooCommerce for product management

Delivered a scalable and easy-to-manage website with improved performance and flexibility.

Blooming Minds Website

UI Designer & WordPress Developer 2026

Tech Used: WordPress, Elementor

Link:- [Web Link](#)

Developed a clean and modern website using WordPress and Elementor, focusing on structured layout, responsive design, and smooth user experience.

- Designed and implemented page layouts directly in Elementor with proper spacing, typography, and section alignment
- Created reusable sections and templates to maintain consistency across the website
- Ensured responsive design across mobile, tablet, and desktop devices
- Worked on content structuring and layout improvements to enhance readability and usability

Delivered a visually consistent and easy-to-manage website that improves user experience and content presentation.

Saras AI Platform

UI/UX Designer & Frontend Developer

Tech Used: Figma, React.js, Tailwind CSS

Link:- [Figma Link](#) | [Web Link](#)

Designed and developed a modern AI platform website & admin panel with a focus on clear content structure and user-friendly navigation.

- Designed UI layouts and user flows in Figma
- Converted Figma designs into a fully responsive React.js website
- Ensured consistency in design system and responsive behavior across devices

Delivered a visually engaging and performance-optimized web experience.

Change Therapy Platform

Web & Admin Panels Frontend Developer

Tech Used: React.js (v18), Bootstrap 5, REST APIs, Create React App

Link:- [Main Web](#) | [Vendor Panel](#) | [Admin Dashboard](#)

Built a complete therapy management platform with three separate panels for users, vendors, and admins.

- **User App:** Designed a responsive web app where users can sign up, log in, and book therapy sessions. Focused on clean layout, smooth navigation, and mobile-friendly design.
- **Vendor Panel:** Developed a dashboard for therapists to manage their availability, time slots, chat with users, and update profiles and status in real time.
- **Admin Panel:** Created a centralized admin interface to manage all users, vendors, and platform settings. Integrated secure routing and dynamic content handling via REST APIs.

Handled the entire frontend development independently, ensuring consistency across all panels and seamless user experience.

OverNight Websites

UI developer

Tech Used: HTML5, SCSS (Dart Sass 1.89.1), Bootstrap 5.3

Link:- [Over Night](#) | [Figma Link](#)

Developed a collection of 17 responsive website templates from scratch. Focused on clean layout design, modular SCSS styling, and mobile-first responsiveness using Bootstrap. Integrated a contact form with API functionality to handle form submissions securely and efficiently. Each template was lightweight, accessible, and ready for quick deployment across different business types.

Taboo Game

UI Redesign Frontend Developer

Tech Used: React.js (v18), Tailwind CSS (v3.4), Vite (v5), Axios (v1.6), React Router v6

Link:- [Taboo Web](#)

Designed and developed a fully responsive gaming platform that allows users to **create, host, and purchase games** through a clean and intuitive interface. The project involved building reusable UI components in React and styling them using Tailwind CSS for a consistent and modern look across all devices. Integrated REST APIs using Axios to fetch and update data in real time, including game listings, user accounts, and purchase history.
